## WORK EXPERIENCE

### Front-end Developer | Green Rabbit Game

February 2022 - November 2022

Green Rabbit Game is a NFT game Platform. And I worked as a front-end developer in this company.

I contributed to build beautiful, responsive websites and dashboard which interact with users directly.

I mostly worked with JS, TS and Svelte for the front-end development. and I also worked on back-end development which was Smart Contracts.

### Full Stack Developer | Bell Pepper Investment

February 2020 - April 2022

Bell Pepper Investment is a real estate company. I have built several websites and platforms. The main stack I used during my stay in Bell Pepper Investment was ROR stack and React.js + Django stack. I was also involved in mobile app development, using React Native.

### Spring MVC | AliExpress

March 2018 - February 2020

I have 2 years of experience with building e-commerce using Spring framework.

This is my company: <https://www.aliexpress.us/>

I have built some Back-end and Dashboard (Front-end) with team.

I have used some skills such as Spring MVC, JDBC, JSP and Angular.

I have also worked by using Spring boot on IntelliJ IDEA.

I have worked on git with my team and tested by using JUnit and TestNG.

### Full Stack Web | Mobile App developer | Self-Employed

January 2017 - March 2018

I started my career as a developer in 2017. I mostly did web development and mobile app development for the clients which I met on freelancing platforms. I continuously try my best to get myself experts in development. I never stop learning new skills and improving the code quality. By doing this, I was able to deliver satisfying works to my clients. As I worked as freelancer, I was able to become experts in those skills: Html, CSS, Bootstrap, Tailwind, JS, TS, React.js, Vue.js, Node.js, PHP, Laravel, Django, ROR, AI, Discom and React native/Flutter for Mobile App development.
