|---|---|
| **Software Packages:** | QGIS, ArcGIS, Post GIS, Flutter, Cpanel, Jenkin, word press, Elementor, Prestashop |
| **Version Control:** | Git, GitLab, BitBucket, GitHub. |
| **Operating System:** | Windows, Mac OS, Linux. |
| **Libraries:** | GDAL (Python, C++), Open Layer, OpenCV, Leaflet, JQuery. |
| **Cloud Services:** | AWS, Google Cloud, Heroku |
| **Task Management Tools:** | JIRA, Trello, Asana, Notion, ClickUP |
| **API Building Tools:** | REST API, Open API, Graph QL |
| **Neural Network Tools:** | DNN, CNN, RNN, LSTM |
| **Data visualisation Tools:** | Tableau, Power BI, Figma, Adobe XD, Microservices |
| **Blockchain Tools:** | NFT minting, Solona, Cardona |
| **Methodologies:** | Agile, Waterfall, SDLC, Scrum. |
| **Developing Tools:** | Visual Studio Code. |
| **Others:** | Cortex, CI/CD, CRUD Operations, Data Visualisation, Presentation, Svetle. |

# Work Experience

## Full Stack Developer / Contractor

**Yogo.DK | May 2022 – April 2023 | Copenhagen, Denmark**
- Developed and maintained a responsive web application using **Vue.js** and **Sails.js** as the primary frontend and backend frameworks respectively.
- Designed and implemented new features for the platform, including an online booking system and real-time chat functionality, resulting in increased customer satisfaction and engagement.
- Worked closely with the **UX design** team to ensure seamless integration of design elements and improve overall user experience.
- Implemented automated testing using Jest and Mocha for frontend and backend respectively, reducing testing time by 40%.
- Collaborated with the **DevOps** team to manage deployment and scaling of the platform on **AWS**, resulting in improved performance and stability.
- Mentored and trained junior developers in frontend and backend development, providing guidance on best practices and design patterns.
- Actively participated in **Agile development methodologies**, contributing to daily stand-up meetings, backlog grooming, sprint planning, and retrospectives.

## Full Stack Engineer / Contractor

**Kaiku Health (Elketa Kaiku) | Oct 2021 – May 2022 | Helsinki, Finland**
- Developed a health monitoring server/app in **Python/Django** and react to keep track of the application's health.
- Built a managed social network platform for brands using **React.js**.
- Built the foundations of a web components library to integrate into client's web applications.

- Developed and implemented a strategy for migrating the **Vue** to **React** additively.
- Redesigned database and **API** using **ASP.NET** and **C#** for consistency, readability, performance and future expansion.

## Sr Front-end Developer / Contractor

**My Tutoring World | Jan 2021 – Sep 2021 | Madrid, Spain**

- Designed and developed the user interface for My Tutoring World using **Angular**, resulting in a modern and responsive design for the tutoring site.
- Collaborated with the backend development team to integrate the frontend with the backend using **RESTful APIs** and web sockets.
- Implemented user authentication and authorization features using **JSON Web Tokens** (**JWT**) and Angular's built-in authentication libraries, resulting in a secure and seamless login experience for users.
- Optimized the site's performance by reducing the page load time and implementing lazy loading for images and components.
- Worked with the product team to develop new features and improve the overall user experience of My Tutoring World.
- Troubleshot and debugged frontend issues, reducing average bug resolution time from one week to one day.
- Mentored junior developers on frontend design principles, coding best practices, and professional development.

## Full Stack Developer / Full time

**MMO-Wiki | Aug 2018 – Sep 2019 | Southampton, England, UK**

- Designed and built a WordPress website, MMO-Wiki, from scratch, leveraging my knowledge of **HTML**, **CSS**, and **JavaScript**.

- Developed custom **WordPress plugins** to fetch data from Google Sheets and automate post creation, reducing manual effort by 50%.
- Wrote and published high-quality content on MMO-Wiki, utilizing my excellent writing skills and expertise in online gaming.
- Implemented **SEO** strategies, resulting in a 25% increase in organic traffic and higher search engine rankings.
- Collaborated with a team of developers and designers to optimize the website's user experience and improve site performance.
- Conducted regular maintenance and updates to ensure the website was always up-to-date and running smoothly.
- Analyzed website analytics and user behavior to make data-driven decisions and continuously improve the site's performance.

# Education

**Degree (Bachelor), Computer Science**

**2015 - 2018 | University of Helsinki**

# Certifications

**Legacy Full Stack developer**

**Responsive Web Designer**

**Backend Developer**

**Information Security and Quality Assurance**

**JavaScript & Algorithm & Data Structure Master**

**Data Visualization Expert**

# Specializations

-Web Development (Pixel- Perfect)

-GIS Development

-Blockchain Development

-Familiar with Various Work methodology

-Proficient with Design tool (Figma, Adobe)

-Unit testing

# Languages Spoken

-English – Fluent

-Vietnamese – Fluent

-Chinese – Beginner
